- MERN STACK
- BUSINESS ANALYTICS
- DATA SCIENCE

MERN STACK

MERN Stack is a popular set of tools used to build web applications — from the front-end (what users see) to the back-end (server and database).

M – MongoDB

A NoSQL database that stores data like a digital filing system.

E – Express.js

A web framework for Node.js used to build the back-end (server-side).

R – React.js

A JavaScript library used to build the front-end (user interface).

N – Node.js

A JavaScript runtime that lets developers run JavaScript on the server.

JOBE ROLES

- MERN Stack Developer
- Full-Stack Developer
- Front-End/Back-End Developer
- Web Application Developer
- UI/UX Developer (with React)

PYTHON FULL STACK

Full stack refers to the entire technology stack used in web development .

FRONTEND (Client side) ; HTML , CSS, Java Script , React js , Bootstrap.

BACKEND (Surver side using Python) ; Python , Django , API development .

Database ; SQL - (MySQL , SQLite,), MongoDB (for NoSQL).

TOOLS & DEPLOYMENT - Git- and GitHub (version control)

Heroku ,or others. (deployment)

WHY OUR TEACHERS STAND OUT?

- Industry-experienced and certified trainers
- Focus on real-time projects and interview training
- Personalized mentoring and doubt clearance
- Involved in curriculum updates based on tech trends

IMPORTANCE OF SOFT SKILL

- Technical knowledge gets you to the interview. Soft skills help you crack it.
- Our soft skills sessions are led by trainers with real-world corporate and academic experience in communication and behavioral training.
- Practical & Activity-Based Sessions
- Classes include mock interview preparations and resume building sections.
- Individual Focus & Confidence Building

FACILITIES AND RESOURCES
